PROFILE

Third-year Computer Science Technology student seeking a software development internship. Hands-on experience in backend development and object-oriented programming through team and personal projects. Persistent and rigorous, fluent in four languages: French, English, Armenian, and Russian.

TECHNICAL SKILLS

Programming Languages: C# (intermediate), Java (beginner), Python (beginner), JavaScript (intermediate), SQL (intermediate)

Web Development: React, Node.js, HTML, CSS

Databases: MongoDB, SQL, MySQL, PL/SQL

Game Engine: Unity

Tools and Version Control: Git, GitHub

Operating Systems: Windows 10/11, Ubuntu, Debian

Software: Microsoft Office (Word, Excel, PowerPoint)

EDUCATION

College de Bois-de-Boulogne : Computer Science (DEC)

2024 - Present

Montreal, QC | Programming, web development, and software engineering

Sourp Hagop High School

2019 - 2023

Montreal, QC

CERTIFICATIONS

- Anthropic Academy – Claude with Amazon Bedrock (In Progress)
- Anthropic Academy – Model Context Protocol (MCP) (In Progress)
- Anthropic Academy – Retrieval-Augmented Generation (RAG) (In Progress)

PROJECTS

Banking System: Backend API

SQL, PL/SQL, JavaScript | Team project

2025

- Designed and developed REST API endpoints (GET, POST, PUT, DELETE) for a banking management system.
- Implemented CRUD operations on the database using SQL and PL/SQL, including data insertion, retrieval, updates, and deletion.

VAMP2 Survivors: Video Game 3D

2026

C#, Unity | Academic project

- Developed a survival game inspired by "Vampire Survivors" in C# using the Unity engine.
- Programmed enemy behavior and reactions in C# using object-oriented programming principles.
- Implemented a decoy mechanic for enemies and wrote unit tests to verify correct game behavior.

Travel Express: Full-Stack Web Application

2026

React, Node.js, MongoDB | Team project: responsible for the backend

- Developed the application backend: API routes and server-side logic in Node.js.
- Implemented user authentication with JWT tokens to secure access.
- Collaborated with the team using a Git workflow, from the frontend (React) to the database (MongoDB).

File-Sharing System: Analysis and Design (UML)

2026

*Analyse par diagrammes de cas d'utilisation UML et rédaction des spécifications détaillées du système.***Dossier: AI-Powered B2B Research Platform - <https://rundossier.co>**

2026

TypeScript, Node.js, Express, PostgreSQL, React, Claude API, Apify | Personal Project

- Designed and developed the backend architecture, REST APIs, and authentication.
- Built AI agents for research, personalization, and quality assurance using Claude.
- Integrated third-party APIs and PostgreSQL to automate end-to-end research workflows.

TradeCatch: Full-Stack SaaS Platform - <https://tradecatch.ca>

2026

Next.js, TypeScript, Cloudflare Workers, OpenNext, APIs, Webhooks

- Developed and deployed a full-stack SaaS platform designed to automate lead capture, follow-ups, and customer conversion workflows for local service businesses.
- Built responsive user interfaces, backend workflows, API integrations, automated notifications, and production deployment infrastructure using Cloudflare Workers.
- Implemented production-ready architecture with authentication, form processing, error handling, deployment configuration, and performance-focused UI/UX.

SentinelOps: Cloud-Native Incident Management & Alerting Platform

2026

AWS, ASP.NET Core, C#, DynamoDB, Lambda, API Gateway, CloudWatch

- Built a cloud-native incident management platform that ingests, processes, deduplicates, and correlates infrastructure and application alerts into actionable incidents.
- Developed an ASP.NET Core REST API with structured logging, validation, exception handling, pagination, filtering, rate limiting, and OpenAPI/Swagger documentation.
- Designed an AWS-based alert deduplication engine using normalized fingerprints, DynamoDB conditional writes and TTLs to prevent race-condition duplicates and automatically group recurring alerts.
- Implemented incident lifecycle management, severity escalation, alert-volume tracking, responder assignment, comments, tags, timestamps, and incident reopening logic.

WORK EXPERIENCE

Busser: Restaurant Grillade Nostos

Sept. 2025 - Nov. 2025

Montreal, QC

- Cleared and reset tables to keep dining-room service running smoothly.
- Supported the serving team during peak hours.

VOLUNTEERING

Youth Leader: SCAMA Community Centre

Summer 2024 and Summer 2025

Montreal, QC

- Led recreational and social activities for seniors, creating a welcoming environment.

LANGUES

French (fluent) | English (fluent) | Armenian (native) | Russian (native)

INTERESTS

Sports: Weightlifting, wrestling, soccer, judo

Books: French literature and philosophy

Other: Investing and trading, hiking, combat sports
